

Global Infant Nutrition Ingredients Market to Reach US\$168.1 million by 2027 - IndustryARC

Aversion among a major chunk of the population regarding feeding babies with formulas is said to reduce the market growth.

HYDERABAD, TELANGANA, INDIA, February 2, 2023 /EINPresswire.com/ --

IndustryARC, in its latest report, predicts that [Global Infant Nutrition Ingredients Market](#) size is estimated to reach \$31.2 billion by 2027, growing at a CAGR of 9.2% during the forecast period 2022-2027. Infant nutrition ingredients are demarcated as a

description of nutritious food designed for infants (<12 months). A nutritious diet plays a significant role in the growth and development of infants. Even though breast milk is the best source of nutrients and it has been recommended by premier organizations like WHO and PAHO to breastfeed babies; however, owing to changing lifestyles iron-enriched infant formula has emerged as a prominent infant nutrition source. Many babies are fed with standard formulas derived from soy milk to overcome the complications of lactose intolerance in babies. Vitamin, Proteins, carbohydrates, fatty acids, and antioxidants like beta carotene are the major ingredients of infant nutrition. Furthermore, rising incidences of breast cancer in women have made breastfeeding inadequate for babies; as a result, demand for the aforementioned market is augmenting day after day. Also, changing lifestyles, rising disposable incomes, and flavor innovations are factors set to drive the growth of the Global Infant Nutrition Ingredients Market for the period 2022-2027.
