

Pesticide Intermediate Market to Garner \$157.4 Billion by 2027 : IndustryARC

Natural pesticides presence is said to be a preeminent driver driving the growth of the Pesticide Intermediate Market.

HYDERABAD, TELANGANA, INDIA, February 3, 2023 /EINPresswire.com/ --

IndustryARC, in its latest report, predicts that [Pesticide Intermediate Market](#) size is estimated to reach

\$157.4 billion by 2027, growing at a CAGR of 6.8% during the forecast period 2022-2027. Pesticide

intermediates can be demarcated as chemicals taken into account for the

production of various categories of pesticides such as insecticide, bactericides, and herbicides/weeding. Chloroacetylchlorid, Chloroacetic acid, Thiosemicarbazide, Dimethyl chlorothiophosphate, and others are a few examples of intermediates used for the production of several chemical pesticides. These intermediates alone are well suitable for use as pesticides also as they hold many properties similar to pesticides. Pesticides have become an indispensable part of the modern-day agriculture industry as they are of great help in controlling several crop diseases instigated by microorganisms. Moreover, pesticides such as algicides and disinfectants have many household functions ranging from killing bacteria to impeding the growth of algae in swimming pools. The pesticide intermediates market outlook is very appealing due to elevating awareness among small farmers about the availability and effectiveness of such options. Decreasing farming land due to rapid industrialization around the globe is accruing the demand for crop productivity and greater yield by using bio-pesticides is a major factor set to drive the growth of the Pesticide Intermediate Industry for the period 2022-2027.
