

# Forage Seed Market size is forecast to reach \$17,950 million by 2026 - IndustryARC

*Rising awareness towards livestock health among people and increasing demand of meat and meat products are enhancing the growth .*

HYDERABAD, TELANGANA, INDIA,  
February 4, 2023 /EINPresswire.com/ --

IndustryARC, in its latest report, predicts that [Forage Seed Market](#) size is estimated to reach \$17,950 million by 2026, growing at a CAGR of 7.8% over 2021-2026. Forage is a kind of plant that is mostly used by the dairy farmers for feeding animals. There are

various types of forage plants such as chicory, ryegrass, alfalfa, timothy, clover, bent grass and many more. Silage is the final product of forage seed when it is conserved and stored. Forage seeds are also available in low cost than any other feeds such as wheat bran and oil seed. Tree legumes provides various advantages in agriculture and forestry such as forage for animal production, fuel wood and timber production and many more. Forage crops are used in the form of pasture, fodder, and silage. Rising awareness towards livestock health among people and increasing demand of meat and meat products is the major factor driving the growth of Global Forage Seed Market. Furthermore, increasing consumption of organic food and feed products, reduction of land for grazing of animals and growing development in feed industry is set to further enhance the overall market demand for Global Forage Seed Market for the period 2021-2026.
