

Laparoscopic Devices Market Growth in Future Scope 2023-2028 | Olympus Corporation, B. Braun Melsungen AG

Laparoscopic devices are equipped with small two dimensional camera with a source of light in it.

Laparoscopic Devices Market

BURLINGAME, CA, UNITED STATES,
February 2, 2023 /EINPresswire.com/ --

Laparoscopy, or diagnostic

laparoscopy, is a minimally-invasive

surgical diagnostic procedure used to

examine the organs inside the abdomen, with the help of laparoscopic devices, such as a

laparoscope, closure devices, suction or irrigation device, insufflation devices, robot assisted

system, trocars/access device, energy products, and hand access instrument. Procedures such as

organ removal, bowel resection, gastric bypass, and hernia repairs are routinely carried out with

the help of laparoscopic devices. It is mainly preferred for

carrying out surgeries related to the bile duct, colon, liver,

and pancreas. The, growth of the [laparoscopic devices](#)

[market](#) can largely be attributed to factors such as the

increasing prevalence of colorectal cancer and rising

adoption of minimally invasive surgeries, worldwide.

“

The global laparoscopic devices market is estimated to be valued at US\$ 11,974.3 million in 2022 and is expected to exhibit a CAGR of 6.1% during the forecast period (2022-2030).”

According to the National Cancer Institute, in 2018, around 1,365,135 people were living with

colorectal cancer in the United States. Moreover, according to the American Society of Clinical

Oncology, in 2021, around 149,500 American adults will be diagnosed with colorectal cancer.

These numbers include 104,270 new cases of colon cancer (51,680 women and 52,590 men) and

45,230 new cases of rectal cancer (18,300 women and 26,930 men). Laparoscopy is also a

minimally invasive procedure that require small incisions. In laparoscopy, surgeons make a small

incision of 0.5-1 cm, which allows surgeons to operate with more safety and efficacy compared

to traditional open surgery, which involves pain and risks to the patient.

Minimally invasive surgery refers to any surgical procedure that is performed through small incisions rather than a large opening. Since the early 1990s, this technique has largely replaced the open technique for cholecystectomies. Thus, the increasing adoption of minimally invasive procedure is driving the laparoscopic devices market growth. Around 15 million laparoscopic procedures are performed every year, worldwide. Since the advent of laparoscopy in the 1990s, the technique is used to perform 1.2 million cholecystectomies. Minimally invasive surgeries are linked to improved patient outcomes and accelerating recovery times. Therefore, there is an increasing demand for minimally invasive surgeries, such as laparoscopic surgeries.

Detailed Segmentation:

Global Laparoscopic Devices Market, By Product Type:

- Direct Energy System Devices
- Trocars/Access Devices
- Internal Closure Devices
- Laparoscopes
- Hand Access Instruments
- Insufflation Devices
- Robotic Assisted Surgical System

Global Laparoscopic Devices Market, By Therapeutic Application:

- Bariatric Surgery
- Colorectal Surgery
- General Surgery
- Gynecological Surgery
- Urological Surgery
- Others (Hematology, etc.)

Global Laparoscopic Devices Market, By End User:

- Hospitals
- Specialty Clinics
- Ambulatory Surgical Centers

Furthermore, the growth of the laparoscopic devices market can be attributed to the increasing prevalence of obesity, around the world. Laparoscopic surgery for obesity is for people who are severely overweight. Bariatric surgery is done to help lose excess weight and reduce the risk of potentially life-threatening weight-related health problems. One of the newer choices for bariatric surgery is called laparoscopic sleeve gastrectomy (LSG). Thus, with the increasing

prevalence of obesity, the demand for laparoscopy is also increasing, and thereby increasing the demand for laparoscopic devices. However, the high cost of laparoscopic surgery is one of the major factor restarting the laparoscopic devices market growth.

Promising Regions & Countries Mentioned in Laparoscopic Devices Market Report:

North America (United States, Canada, Mexico)

South America (Brazil, Argentina, Columbia, Chile, Peru)

Europe (Germany, UK, France, Italy, Russia, Spain, Netherlands, Turkey, Switzerland)

Middle East & Africa (GCC, North Africa, South Africa)

Asia-Pacific (China, Southeast Asia, India, Japan, Korea, Western As)

Laparoscopic Devices Market Report Analyzed by Following Points:

1. Company Profile
2. Business Segments Analysis
3. Financial Analysis
4. SWOT Analysis
5. Possible Impact Of Covid -19 On Latest Market Conditions

Report Answers Following Questions:

1. What are the factors driving the growth of the market?
2. What factors are inhibiting market growth?
3. What are the future opportunities in the market?
4. Which are the most dynamic companies and what are their recent developments within the Laparoscopic Devices Market?
5. What key developments can be expected in the coming years?

In conclusion, the Laparoscopic Devices Market report is a reliable source for accessing the Market data that will exponentially accelerate your business. The report provides the principal locale, economic scenarios with the item value, benefit, supply, limit, generation, request, Market development rate, and figure and so on. Besides, the report presents a new task SWOT analysis, speculation attainability investigation, and venture return investigation.

About Coherent Market Insights

Coherent Market Insights is a global market intelligence and consulting organization that provides syndicated research reports, customized research reports, and consulting services. We are known for our actionable insights and authentic reports in various domains including aerospace and defense, agriculture, food and beverages, automotive, chemicals and materials, and virtually all domains and an exhaustive list of sub-domains under the sun. We create value for clients through our highly reliable and accurate reports. We are also committed in playing a leading role in offering insights in various sectors post-COVID-19 and continue to deliver measurable, sustainable results for our clients.
