

# KorganoTech Officially Launches Online Store

*KorganoTech is launching its online store to enable purchase of KorganoTech Pathogen air filters, the world's first nanotechnology-based pathogen air filters*

LIVERMORE, CALIFORNIA, UNITED STATES, February 22, 2023 /EINPresswire.com/ -- KorganoTech, a developer of the world's first nanotechnology-based pathogen air filter products, is officially launching its [website](#) to enable purchase of KorganoTech Pathogen air filters for homes, commercial and the Tesla Model 3 & Y EV automobile.

The advertisement features a sunset background with silhouettes of trees and hills. At the top left is the KorganoTech logo, a cluster of blue and white hexagons. The main title is 'KorganoTech Pathogen + Odor Air Filters' in white, with the tagline 'World's Best Pathogen Filtration Technology' below it. The headline 'A New Dawn of Pure Air' is in yellow. Below this, a white box contains the text 'Captures and deactivates > 99% of airborne pathogens (Other filters just trap pathogens for redistribution)'. Underneath are five circular icons: a flower for 'Pollen', a dust mite for 'Dust mite', a bacterium for 'Bacteria', a virus for 'Virus', and a nose for 'Odor'. To the right is an American flag with the text 'Invented & Made in USA'. At the bottom, the text 'KorganoTech Pathogen Air Filters' is displayed.

KorganoTech's unique nanotechnology enables the filtration of fine particles associated with traditional MERV-16 / HEPA filters. A unique layer of porous nanofibers that contain bio-active particles is utilized to deactivate bacteria and virus pathogens on contact. This innovation eliminates the need for additional energy consuming air purification devices to deactivate these pathogens. This solution enables home, commercial and industrial uses to provide clean, energy efficient pathogen free air.

“

We believe that our filters effectively deactivate pathogens (viruses, bacteria, and microorganisms) more effectively than traditional air filter solutions available today.”

*Tim Leong, CEO of KorganoTech*

“We are excited to make our innovative KorganoTech Pathogen air filters available for purchase. We believe that our filters effectively deactivate pathogens (viruses, bacteria, and microorganisms) more effectively than traditional air filter solutions available today.” said Tim Leong, CEO of KorganoTech. Explore our website to see all the available products to

protect your family, friends, employees, and customers.
