Custom Market Insights

[Agricultural Adjuvants Market](#): Overview

The efficiency of the pesticides is improved due to the use of the adjuvants and it helps in improving the penetration of all the active ingredients into the plant foliage. The presence of regulatory supervision for the agricultural adjuvants makes it necessary that these products are safe for usage and they reduce the ill effects of the pesticides being washed off into the environment.

[Agricultural Adjuvants Market](#): Growth Drivers

Most of the agricultural adjuvants are mixed with the chemicals which are used for crop protection or derived from toxic chemical sources and from petroleum. And when these products are used in excessive amounts it has harmful effects on the environment it also affects

human health. The crop's quality and nutritional content are also affected.

The government of various nations has taken steps in order to increase the production of sustainable products and environmentally friendly products. And these steps taken by the government authorities will create more demand for the products that are naturally derived as such products do not have larger risks or threats to the environment as compared to the products that are derived from petroleum oil. The use of toxic products will reduce to a great extent as these products lead to bio-accumulation which is extremely harmful to the ecosystem.

Regional Landscape

The Asia Pacific region will have the largest market share in the coming years and it has dominated the market in the past. It had accounted for a share of about 36% in the past in terms of revenue and it will continue to grow well. There are many factors that have led to the growth of the market in the Asia Pacific region which include increased population, different types of crops and the availability of vast stretches of arable land. Another reason that will help in the growth of the market is the increased purchasing power.

Rapid industrialization and urbanization are some of the factors that will lead to the growth of the market as the availability of land reduces. Agrochemicals are used on a large scale in order to increase yield and productivity. In the countries like Japan, China and India there is a maximum consumption of agricultural adjuvants.

The North American region is also expected to grow well during the forecast period and it will expand at a compound annual growth rate of 2.7% in the coming year. There are many factors that will lead to the growth of the market and one of them is the increase in the agricultural activities of a few nations like Canada and the United States. advanced techniques for agriculture are used and there is the increased use of precision farming which will increase the need for the agrochemical in this region due to which the need for agricultural adjuvants will also continue to grow.

The Agricultural Adjuvants Market is segmented as follows:

By Type

- Utility adjuvants
- Activator adjuvants

By Application

- Insecticides
- Fungicides
- Herbicides
- Others

By Crop

- Oilseeds and pulses
- Cereals and grains
- Fruits and vegetables
- Others

By Geography

North America

- The USA
- Canada
- Mexico

Europe

- The UK
- Germany
- France
- Italy
- Russia
- Rest of Europe

Asia Pacific

- China
- India
- Japan
- South Korea
- Malaysia
- Philippines

Rest of Asia-pacific

Latin America

Brazil

Rest of Latin America

Middle East and Africa

GCC

North Africa

South Africa

Rest of Middle East & Africa
