

Omega-3 Products Market Size to Boost USD\$3.7 billion By 2027 | CAGR 6.1% - IndustryARC

Growing awareness about the health among people and rising incidence of cardiovascular diseases are enhancing the growth of the Omega-3 Products Market.

HYDERABAD, TELANGANA, INDIA, February 6, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Omega-3 Products Market](#)

size is estimated to reach \$3,700 million by 2026, growing at a CAGR of 6.1% over 2021-2026. Omega-3 fatty acids are essential nutrients that are

present in certain foods such as flaxseed and fish, as well as dietary supplements such as fish oil as well as in functional foods. It is also referred to as n-3s that contains carbon-carbon double bond located three carbons from the methyl end of the chain. There are several types of omega-3 such as alpha-linolenic acid (ALA), eicosapentaenoic acid (EPA), and docosahexaenoic acid (DHA) where EPA and DHA are considered as long chain omega-3s. Omega-3 fatty acids are polyunsaturated fatty acids that are available in a variety of supplements and vitamins. The omega-3 fatty acids are also present in Cod Liver Oil that come from the liver of cod fish which contains various health benefits. Various fish types such as salmon and tuna are especially high in omega-3 fatty acids that contain docosahexaenoic Acid (DHA). Omega-3 acids such as EPA and DHA are found in dietary supplements that aid in reducing heart diseases. Growing awareness about the health among people and rising incidence of cardiovascular diseases is the major factor driving the growth of this market. Furthermore, increasing research and development activities in food and beverage industry and rising advancement in technology is set to further enhance the overall market demand for Omega-3 Products Market for the period 2021-2026.
