Rising Sugar Consumption is driving the growth of Dental Imaging Market

HYDERABAD, TELANGANA, INDIA, February 6, 2023 /EINPresswire.com/ -- the [Dental Imaging market](#) is expected to grow at a CAGR of 7.20% during the forecast period of 2019-2025. The dental imaging market earned a revenue of \$2.5 billion. According to the World Health Organization, half of the world's population equivalent to 3.58 billion people are affected by oral diseases. Increased sugar consumption and the unhealthy lifestyle of the millennial generation are some primary causes of this statistic. Continued ignorance of dental issues leads to an increased chance of tooth decay, which requires dental imaging for further treatment. Dental imaging is not limited to patient treatment, it is used for forensic and diagnostic as well. Since a large size of the population suffers from dental diseases, the dental imaging market is expected to grow at a CAGR of 7.20% during the forecast period of 2019-2025. Factors responsible for the dominance of the region are the considerable efforts by the American Dental Association along with the wide application of dental imaging in various sectors such as diagnostic, therapeutic, cosmetic, and forensic. The diagnostic segment is can grow at a CAGR of 6.50% through 2025.
