Emergen Research

The global Hospital Acquired Infection (HAI) control market size is expected to reach USD 33.49 Billion in 2030 and register a steady revenue CAGR of 1.5%. Technological advancements in sterilization equipment is a key factor driving market revenue growth. For instance, researchers have created a new technology that employs cold plasma technology and could revolutionize the way medical equipment is sterilized. Instead of using Radio Frequency (RF) or pulsed Direct Current (DC) power, the gadget makes cold plasma using pure direct current high voltage.
