The global Vascular Closure Devices (VCD) market size is expected to reach USD 1.67 Billion in 2030 and register a steady revenue CAGR of 7.0% during the forecast period. Growing prevalence of Cardiovascular Diseases (CVD) and obesity is a major factor driving market revenue growth. For example, World Obesity Federation's World Obesity Atlas 2022, released on 04 March 2022, estimates that one billion individuals worldwide, including one in every five women and seven men, would be obese by 2030.
