

Nutritional Premixes Market size is forecast to reach \$2,849.5 million by 2027 - IndustryARC

The requirement for nutrient-dense foods among consumers and the rising case of malnutrition are two factors driving the growth of the Nutritional Premixes.

HYDERABAD, TELANGANA, INDIA, February 6, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that The [Nutritional Premixes Market](#) is estimated to reach \$2,849.5 million by 2027, growing at a CAGR of 6.9% over the forecast period 2022-2027. A Nutritional Premix is a specially formulated commercial mixture in

which each nutrient component has been precisely proportioned and blended into a premix. Nutritional components like vitamins, minerals, nucleotides, amino acids and others are included in premixes for fortification. The main purpose of nutritional premixes is to increase the nutritious value of end products. In the food and beverage industry, nutritional premixes are progressively becoming one of the most significant ingredients. In addition to food and drinks, nutritional premixes have been widely used in a range of other applications, including animal feed, nutraceuticals, dietary supplements and others. The rising incidence of chronic diseases and rising healthcare costs have led to an increase in the usage of dietary supplements, which has raised the demand for Nutritional Premixes.
