The Council for Inclusive Capitalism is rooted in action. Upon joining, members commit their organizations to specific, measurable actions to operate in ways that advance more inclusive capitalism. Each commitment is mapped by industry, region, and business size and is mapped to the UN Sustainable Development Goals and

World Economic Forum Sustainable Value Creation Pillar.

In order to create more economic opportunities for low-income, low-education, and underprivileged members of society, Base64.ai commits to offering Remote Document Reviewer (RDR) job positions, a revolutionary AI career option. The RDR role involves verifying AI outcomes, which allows organizations to delegate document processes to Base64.ai while enhancing the AI's capabilities. Four full-time RDRs have been working with the AI startup's clients since December 2022. Base64.ai welcomes candidates globally, including those with limited academic backgrounds and basic computer proficiency.
