

Colostrum Market to Reach US\$128.4 million by 2027 - IndustryARC

Growing need to boost immunity in the wake of covid-19 coupled with Increasing awareness regarding healthy gut are likely to aid growth of the Colostrum Market

HYDERABAD, TELANGANA, INDIA, February 7, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Colostrum Market](#) size is forecast to reach \$128.4 million by 2026, growing at a CAGR of 4.6% during the forecast period 2021-2026.

Colostrum is a breast fluid produced by humans, cows, and other mammals right before breast milk is released. It's very nutritious and consists of high levels of antibodies, which are proteins that fight infections and bacteria. The key driving factor of the market is owing to the fact that colostrum contains macronutrients, vitamins, and minerals. It's especially high in protein compounds proline-rich polypeptides and galactooligosaccharides, that help to regulate immune responses and promote growth, including lactoferrin, growth factors, and antibodies. The compounds constituting in colostrum particularly the variety of antibodies and the protein lactoferrin like lactoperoxidase aids to prevent diarrhea associated with bacterial and viral infections. Furthermore, colostrum may enhance immunity, fight infections, and benefit gut health in both humans and animals which is set to further enhance the overall market developments of the Colostrum Market for the period 2021-2026.
