#### Segmental Analysis:

1. Intravenous Immunoglobulin Market Segment Analysis-By Product Type: The Immunoglobulin G (IgG) segment held the largest share in 2020 owing to its ability to control infection of body tissues and to protect the body from infection by binding many kinds of pathogens, such as viruses and fungi. The rise in the applications of Immunoglobulin G (IgG) for the treatment of hypogammaglobulinemia is driving the growth of the Intravenous Immunoglobulin Market. The Immunoglobulin A (IgA) segment is estimated to be the fastest-growing segment with a CAGR of 8.3% over the period 2021-2026.

2. Intravenous Immunoglobulin Market Segment Analysis-By Application: The Hypogammaglobulinemia segment held the largest share in 2020 and is also estimated to be the fastest growing segment with a CAGR of 8.4% over the period 2021-2026. This growth is owing to the factors such as the growing prevalence of hypogammaglobulinemia across the world and the rise in the research and development activities by the key players to develop advanced therapies for the treatment of hypogammaglobulinemia.

3. Intravenous Immunoglobulin Market Segment Analysis-By Geography: North America held the largest share with 29% of the overall market in 2020. The growth in this segment can be attributed to the factors such as an increase in the demand for immunoglobulin G (IgG) for the treatment of chronic inflammatory demyelinating polyneuropathy (CIDP) and a rise in the research and development activities by the key players to develop advanced therapies for the treatment of hypogammaglobulinemia.

#### Competitive Landscape:

The top 5 players in the Intravenous Immunoglobulin industry are -

1. Baxter International Inc,
2. Takeda Pharmaceuticals,
3. Bayer Healthcare,
4. AscellaHealth,

## 5. Kedrion Biopharma,
