“Direct sales channel is expected to dominate market by sales channel between 2023 and 2028” Direct channels help end-user industries to choose the correct specification and get customized PCs according to their requirements. For instance, in November 2019, the BMW Group, a Germany-based global automotive company, partnered with Beckhoff Automation, a leading industrial PC manufacturer. In this partnership agreement, Beckhoff is expected to supply control panels and industrial PCs in new manufacturing facilities and retrofits, meeting the requirements of BMW-specific applications such as machine connectivity, access control, data acquisition, and visualization for the next 10 years. Therefore, the market for direct sales channels is estimated to grow at a higher rate during the forecast period.

“North America to be the largest market for industrial PC during the forecast period” North America is expected to lead the global industrial PC market from 2023 to 2028. The adoption of advanced technologies enhancing the production process in the region. The US and Canada are the largest consumers of industrial PCs in North America. The booming aerospace & defense industry in these countries contributes to the industrial PC market growth. The automotive industry is another major consumer of industrial PCs in North America. Market growth can also be attributed to the pressing need to track manufacturing processes and adhere to regulatory policies while manufacturing products in the process industry.

Key players operating in the market include Advantech Co., Ltd., (Taiwan), Beckhoff Automation (Germany), IEL Integration Corporation (Taiwan), Siemens (Germany), B&R Automation (Austria), Kontron (Germany), Avalue Technology Incorporation (Taiwan), DFI (Taiwan), NEXCOM International Co., Ltd., (Taiwan), and American Portwell Technology Inc. (US).
