

Converge Celebrating a Decade in Business

A decade in business for the company is all about 10 years of savvy IT specialists helping businesses optimize smart and effective business solutions.

CALGARY, ALBERTA, CANADA, February 7, 2023 /EINPresswire.com/ -- A decade of dynamic success is definitely something to celebrate! Particularly in the technology sector, a decade of helping businesses achieve efficiency and success is a significant milestone. It also has a respected and existing track record for providing the innovation to transform and enhance business growth by optimizing smart and effective business solutions.

And [Converge](#), the cutting-edge IT services consultants and Microsoft consulting partners, is proof!

It's a vital fact of today's business life that a significant part of an organization's investment in the future is technology. "Now more than ever, business success relies on digitally streamlined operations and resourcefully leveraging technology," explains the upbeat Casey Hughes, Marketing & Communications Manager at Converge.

"It's our passion and what we do best. We bring people, strategy, and technology together to improve productivity, scalability, and develop insights to make better decisions, faster."

While a decade of Converge innovation has established focused and in-demand specialties like Business Process Automation (BPA), Data Modernization Services, Business Analytics, Modern Workplace Solutions, and Cloud Services and Migration, the Converge secret sauce---and the key to its decade of industry-leading reputation---is relationships and people.

"We have a tenacious team who are down to earth, share a genuine love of new technology, and

bring specialized technical skill-sets to boost a business' efficiency and productivity," Hughes points out. "After all, it's about clear and jargon-free communication. Explaining our ideas and building solutions in ways that everyone understands."

Celebrating a decade in business is also an occasion to emphasize that Converge lives and breathes customer success. It is a Converge core value.

It is a decade of the Converge skill and uniqueness to partner with a business and equip its people with the right tools to best leverage the newest and most suitable technologies. "A decade in business is a valuable part of our reputation," Hughes adds.
