

Organic Fruits & Vegetables Market size is forecast to reach \$52.9 billion by 2026 - IndustryARC

Growing number of health-conscious consumers coupled with the increasing cultivation of organic fruits & vegetables are likely to aid the market growth.

HYDERABAD, TELANGANA, INDIA, February 8, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Organic Fruits & Vegetables Market](#) size is forecast to reach \$52.9 billion by 2026, growing at a CAGR of 7.8% during the forecast period 2021-2026. Organic food in the form of fruits and vegetables refers to

crops that are grown without the use of harmful pesticides, irradiation, fertilizers, pesticide residues, and other synthetic materials. Even the animals under organic farming are fed with organic supply devoid of synthetic growth hormones, genetically modified organisms, or antibiotics. As compared to conventional farming, organic products are rich storehouses of minerals, which is the key driver for the growth of the market. Organic farming increases the potency and benefits of soil, which is popular among farmers. Organic produce is devoid of any hydrogenated fat in the form of polyunsaturated fatty acids and is usually produced using thermophilic composting, which minimizes the risk of any heart-related ailments. Besides better nutritional inputs, organic produce enhances the taste considerably by regulating the sugar content, which is set to further enhance the overall market developments of the Organic Fruits & Vegetables Market for the period 2021-2026.
