In 2018, the men end user segment accounted for more than half of the share in the total sports apparel market and is expected to grow at a CAGR of 4.6% throughout the forecast period. U.S. is one of the prominent regions in the market that accounted for a sizeable share of the total market in 2018. Sports apparel are mainly worn during workout sessions or while playing sports. They are designed to provide comfort and agility while performing physical movements. Sports apparel are made using breathable fabrics that allow sweat to evaporate faster, helping the person wearing it remains fresh for long. Polyester, microfiber, calico, and spandex are some of the most commonly used fabrics in the production of these clothing. Initially, the sports apparel was mostly worn by athletes but, with time, it has become quite common with regular gym-goers and other non-athletes.

The sports apparel market has witnessed significant growth over the years and is expected to grow at a steady pace during the forecasted period. The factors that drive the sports apparel market growth include growth in health awareness and increase in adoption of fitness activities such as aerobics, swimming, running, and yoga among consumers. Moreover, rise in

participation of women in sports and fitness activities along with celebrity endorsement has paved the way for sports apparel. Additionally, increase in disposable income and improvement in living standards in the emerging countries such as China and India along with rise in affinity of consumers in emerging economies toward health and fitness further boost the demand for fitness apparel.

The report segments the global sports apparel market on the basis of end user, distribution channel, and region. On the basis of end user, the market is divided into children, men, and women. Based on distribution channel, it is segmented into E-commerce, supermarket/hypermarket, brand outlets, and discount stores. On the basis of region, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.

According to the sports apparel market analysis in 2018, the men end user segment generated the highest revenue in 2018 and is expected to remain dominant throughout the forecast period. This can be attributed to higher participation of men in sports. However, the women end user segment is expected to grow at the highest CAGR throughout the forecast period. This is due to growing participation of women in sports coupled with increased frequency of product launch, which directly caters the demand for women's apparel.

In 2018, discount store was the most prominent segment accounting for maximum share in the global sports apparel market. This can be attributed to the beneficial options such as discounts and trial before purchase as well as the benefit of immediate gratification. However, the e-commerce segment is expected to witness the highest growth, owing to increase in penetration of internet and online shopping.

Based on the sports apparel market forecast, U.S. accounted for the maximum share in the global market in 2018 and is expected to remain dominant during the forecast period. This can be attributed to higher expenditure of the consumers on fitness apparel due to it being considered a style statement. Moreover, developed retail structure and celebrity brand endorsements help push sales in this region.
