

Hyaluronic Acid Market Trend, Top Manufacturers Analysis, Size, Share and Growth Forecast to 2030

Hyaluronic acid market size was valued at \$1.0 billion in 2020, and is projected to reach \$2.1 billion by 2030, growing at a CAGR of 8.1% from 2021 to 2030

OREGON, PORTLAND, UNITED STATES, February 8, 2023 /EINPresswire.com/ --

The global [hyaluronic acid](#)

[industry](#) generated \$1.0 billion in

2020, and is anticipated to

generate \$2.1 billion by 2030,

witnessing a CAGR of 8.1% from 2021

to 2030. Allied Market Research

published a report, titled, "Hyaluronic Acid Market by End-Use Industry (Cosmetic Industry, Pharmaceutical Industry, and Nutraceutical Industry): Global Opportunity Analysis and Industry Forecast, 2021–2030".

Hyaluronic Acid Market Size

Prime determinants of growth

High benefits of hyaluronic acid in the cosmetic industry and increase in adoption of nonsurgical cosmetic procedures drive the growth of the global hyaluronic acid market. However, presence of alternatives to hyaluronic acid hinders the market growth. On the other hand, technological advancements in hyaluronic acid present new opportunities in the coming years.

Leading Market Players

Contipro a.s.

Landec Corporation

Anmol Chemicals Group

Kewpie Corporation
Shandong Topscience Biotech Co., Ltd.
Liuzhou Shengqiang Biotech Co.,Ltd.
Shijiazhuang lateen chemical co., ltd.
Shandong Focuschem Biotech Co., Ltd.
Tiansheng Bio
Kikkoman Biochemifa Company

Covid-19 Scenario

The outbreak of the COVID-19 pandemic has had a negative impact on the growth of the global hyaluronic acid market.

The implementation of lockdown led to halt the manufacturing activities in the industrial sectors, which correspondingly hampered hyaluronic acid manufacturing facilities.

The raw material procurement was also a challenge for manufacturers, owing to labor shortages and disrupted supply chain.

The pharmaceutical industry segment to maintain its leadership status throughout the forecast period

Based on end use industry, the pharmaceutical industry segment held the highest market share in 2020, accounting for more than half of the global hyaluronic acid market, and is estimated to maintain its leadership status throughout the forecast period. Moreover, the same segment is projected to manifest the highest CAGR of 8.5% from 2021 to 2030, owing to favorable governmental policies in several regions. The report also discusses the cosmetic and nutraceutical industries.

Asia-Pacific, followed by North America, to maintain its dominance by 2030

Based on region, Asia-Pacific, followed by North America, held the highest market share in terms of revenue 2020, accounting for more than four-fifths of the global hyaluronic acid market. Moreover, the Asia-Pacific region is expected to witness the fastest CAGR of 8.3% during the forecast period. This is attributed to the presence of established consumer bases such as pharmaceutical, cosmetics industry, and others. The report also discusses North America, Europe, and LAMEA.
