"Representing a vote of confidence from real software users, these awards also spotlight those that have risen to the top among thousands of companies. With 2 million+ verified software reviews, the most in a single destination, our marketplace features more than 145,000 products and services across 2,100 different categories. Congratulations to all those named, as buyers will continue to lean on these awards as a trusted source to inform their software decisions in the year ahead."

The top 100 companies are ranked based on a combination of Satisfaction and Market Presence scores for each vendor, and the top 100 products are ranked based on reviews across all categories they are a part of. To be recognized as a Best Software Award winner, a software company or product must receive at least 50 approved and published reviews during the 2022 calendar year.
