Healthcare Staffing Market Research Report by IMARC Group

Market Size and Future CAGR:

The global [healthcare staffing market size](#) reached US\$ 36.9 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 53.9 Billion by 2027, exhibiting a growth rate (CAGR) of 6.5% during 2022-2027.

Market Outlook:

Healthcare staffing refers to the process of recruiting and hiring personnel to work in the healthcare industry, which includes hospitals, clinics, nursing homes, and other healthcare facilities. The agencies match qualified candidates with suitable healthcare facilities and positions, ensuring both parties are satisfied with the arrangement. It offers various benefits, including access to a pool of qualified and experienced candidates, a range of job opportunities, and flexible work arrangements. Healthcare staffing also offers various services, such as authenticating candidate and worker credentials, validating skills, verifying licenses and certifications, and carrying out screening procedures.

Market Trends:

The burgeoning geriatric population and escalating prevalence of chronic diseases have surged the demand for healthcare services and personnel, which is one of the key factors boosting the market growth. Moreover, the shortage of healthcare workers and increasing demand for home healthcare services are other growth-inducing factors. Furthermore, the lack of healthcare professionals during the recent COVID-19 outbreak and the escalating demand for specialized healthcare workers, such as physical therapists and nurse practitioners, are providing a considerable thrust to the market growth. Apart from this, the burgeoning healthcare expenditure, rapid advancements in medical technology, the increasing focus on patient satisfaction, and the surging demand for rural healthcare services are positively contributing to the market growth.
