3D Printing Plastics Global Market Report 2023 –  
Market Size, Trends, And Global Forecast 2023-2032

The Business Research Company's "3D Printing Plastics Global Market Report 2023" is a comprehensive source of information that covers every facet of the 3D printing plastics market.

As per TBRC's 3D printing plastics market forecast, the [3d printing plastics market size](#) is expected to grow to \$3.25 billion in 2027 at a CAGR of 23.2%.

The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032"

*The Business research  
company*

The rising use of 3D printed plastic in the automotive sector is expected to propel the growth of the 3D printing plastic market. North America is expected to hold the largest 3D printing plastics market share. Major players in the 3D printing plastics market include 3D Systems Corporation, Stratasys Ltd., Arkema SA, EOS GmbH, Evonik Industries AG, EnvisionTEC Inc., BASF SE, Materialise NV, Avient Corporation.

Trending 3D Printing Plastics Market Trend

Product innovation is a key trend gaining popularity in the 3D printing plastics market. The companies operating in the 3D printing plastics market are focusing on developing the

innovative product with the latest technologies to meet fast-growing industry demands and strengthen their market position across the globe. For instance, in February 2021, Nexa3D, a USA-based developer of ultrafast stereolithography production 3D printers, and Henkel jointly launched new class of photoplastics for 3D printing.

### [3D Printing Plastics Market Segments](#)

- By Type: Photopolymers, ABS, PLA, Polyamide, Other Types
- By Form: Powder, Filament, Ink
- By Application: Prototyping, Manufacturing
- By End-Use Industry: Aerospace and Defense, Healthcare, Automotive, Electronics and Consumer Goods, Other End-users
- By Geography: The global 3D printing plastics market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Read more on the global 3D printing plastics market report at:

<https://www.thebusinessresearchcompany.com/report/3d-printing-plastics-global-market-report>

3D printing plastic refers to plastic filament used in 3D printing. It is a thermoplastic with a base of elastomers based on polybutadiene, which makes it a more flexible material. 3D printing plastics can be used to create almost anything, including prototyping, manufacturing, anatomical models, and other applications.

3D Printing Plastics Global Market Report 2023 from TBRC covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The 3D Printing Plastics Global Market Report 2023 by The Business Research Company is the most comprehensive report that provides insights on 3D printing plastics global market size, drivers and trends, 3D printing plastics global market major players, competitors' revenues, market positioning, and 3D printing plastics global market growth across geographies. The 3D printing plastics global market report helps you gain in-depth insights on opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
