Caustic Soda Market 2023

The global caustic soda market size reached 80.6 Million Tons in 2022. Looking forward, IMARC Group expects the market to reach 89.7 Million Tons by 2028, exhibiting a growth rate (CAGR) of 1.7% during 2023-2028.

Caustic soda, also called sodium hydroxide (NaOH), is a highly caustic and alkaline chemical used in various industrial and household applications. It is a white, crystalline solid soluble in water and has strong cleaning and degreasing properties. Its common uses include soap making, paper production, water treatment, and petroleum refining. It effectively removes grease, oil, and dirt from surfaces, making it a common ingredient in household and industrial cleaning products. It is also used as a starting material in the production of many chemicals, such as dyes, detergents, and synthetic fibers.

Caustic Soda Market Trends:

The global market is majorly driven by the increasing demand from various end-use industries such as soap and detergents, pulp and paper, water treatment, and chemical production. In line with this, the rising demand for consumer goods such as soaps, detergents, and other cleaning products is significantly contributing to the market growth. Furthermore, the growing demand for paper products is positively influencing the growth of the caustic soda market, as it is used in the pulping process of paper production. Apart from this, the escalating need for clean water and the increasing demand for water treatment products are propelling the product demand.

Moreover, the expansion of chemical industries, especially in developing countries, is expected to drive the demand for caustic soda as a raw material for various chemical products. Besides, the rising product demand in several manufacturing and downstream processes is strengthening the market. Additionally, the growing product utilization as a food preservative ingredient that helps to prevent and protect food from bacteria is anticipated to bolster the market growth worldwide.
