

Archi-Tectonics Renovates North Salem Residence

TORONTO, ON, CANADA, February 10, 2023 /EINPresswire.com/ -- [Archi-Tectonics](#) renovated the existing 4070 sq ft residence and created new sculptural fences throughout the property. Interior renovation included re-designing the bathrooms and the kitchen / dining area, creating airy relaxed spaces featuring natural materials and playful accents. The classic features of the house were expressed further by modern brass fixtures by Vola and brass light switches by Forbes and Lomax. The simple and elegant neutral stone surfaces are lit by luxurious glass light Fixtures by Articulo. Custom-made furniture pieces further balance the classic features of the house with the modern urban lifestyle of its owners.

The gorgeous rolling hills of the landscape asked for a very special intervention. Knowing the creative client, it was clear that a regular fence around the pool and pond of the property would not work. The design team looked to use a natural material that was at the same time strong, sculptural and would not obstruct the

spectacular views. The choice fell on Ipe hardwood, the design with uniform planks being held perfectly straight by a delicate steel connection at the bottom, expresses the rolling hills of the property even further. This creates a beautiful rhythm, with the wood elements moving up and

down with the landscape. The fences frame the surrounding gardens, the pond, the pool, and the house beautifully, while still leaving the view unobstructed and transparent.
