

Sugar Free Carbonated Drinks Market Expected to Reach \$243.5 Billion | CAGR of 7.3%

North America and Europe are characterized by high disposable income, higher penetration of fast food chains

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATES, February 10, 2023

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Sugar Free Carbonated Drinks Market](#) By Type, Flavor, and Distribution Channel: Global Opportunity Analysis and Industry Forecast, 2021–2030," the global sugar free carbonated drinks market size is expected to reach \$243.5 billion by 2030 at a CAGR of 7.3% from 2021 to 2030.

Sugar free carbonated drinks are low calorie or no calorie carbon infused drinks with added natural/artificial flavors, coloring, preservatives, and other ingredients. Aspartame, Saccharin, Acesulfame K are some of the sugar substitutes used as sweetener in sugar free carbonated drinks. The rise in prevalence of obesity and high blood sugar levels among the population boost the demand for sugar free carbonated drinks. Regular carbonated drinks contain sugar that is harmful for health thus people shift toward sugar free substitute of carbonated drinks. According to a study by the Global Burden of Disease, around 4.72 million people died prematurely due to obesity and around 6.53 people died due to high blood sugar in 2017.

Higher consumption of added sugar may lead to obesity that again results in various health risks such as heart disease, diabetes, high blood pressure, and certain cancers. These factors are responsible for rise in health consciousness among the population. Moreover, surge in health awareness among the global population boosts the demand for sugar free substitutes of carbonated drinks. These factors propel the growth of the sugar free carbonated drinks market during the forecast period. The desire to look fit and active among the consumers is a key factor fueling the demand for sugar free carbonated drinks in the market.

The growth and development of restaurant chains, cloud kitchens, food delivery services, quick service restaurants, and fast food chains foster the sugar free carbonated drinks market growth. The fast food chains such as KFC, Pizza Hut, Domino's, YUM Brands, and Burger King, most of the times include a carbonated soft drink in their regular affordable meal plan. This resulted in the increased consumption of sugar free carbonated drinks across the globe. According to the data published by the Centers for Disease Control and Prevention (CDC), around 36.6% of adults in the U.S. consume fast food on regular basis. Therefore, the rise consumption of fast food from the popular fast food chains is exponentially contributing toward the growth of the sugar free carbonated drinks industry.
