

Shortening Market is Expected to Reach \$6,373.6 Million | Europe held the major shortening Industry share

The shortening market is expected to witness significant growth due to growth of the processed food industry

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATES, February 11, 2023

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Shortening Market](#) by Source, Application, and Sales Channel: Global Opportunity Analysis and Industry Forecast, 2021-2030,"

The image shows the cover of a report titled "Global SHORTENING Market". The cover features a photograph of shortening in a wooden bowl. The text on the cover includes: "Global SHORTENING Market", "Opportunities Analysis and Industry Forecast, 2021-2030", and "Global Shortening Market is expected to reach \$6,373.6 Million by 2030. Growing at a CAGR of 4.2% (2021-2030)". The Allied Market Research logo is visible in the top right corner of the image.

The global shortening market size was valued at \$4,250.0 million in 2020, and is estimated to reach \$6,373.6 Million by 2030, registering a CAGR of 4.2% from 2021 to 2030. In 2020, the vegetables segment accounted for significant revenue share in the market, and is expected to grow at a CAGR of 3.8% throughout the forecast period. Europe is one of the prominent regions, which accounted for a sizeable share of the total market in 2020.

The global shortening market has witnessed significant growth over the years, and is expected to grow at a steady pace during the forecast period. This is attributed to increase in demand for animal and marine fats and oils from the foodservice sector and rise in use of lard in the baking industry as bread spreads. In addition, the animal source has expanded rapidly as a result of increased demand from downstream industries such as biodiesel, food, oleo chemical, and pet food. Consumers in developing regions, such as Asia-Pacific, prefer lard over butter in baked goods, thus driving the shortening market trends.

Shortening fat is utilized in most mixtures and batters, to provide the baked item a fresh and brittle texture. Shortening fat can be made from either animal fat or vegetable oil, but shortening made from mostly or completely hydrogenated vegetable oil is more common

nowadays. The shortening fat is used in the wider application of the food industry such as ice-creams, dried noodles, and other functional food items for better taste and longer shelf-life in the market.

According to the shortening market analysis, the market is segmented into source, application, sales channel, and region. Depending on source, the market is divided into vegetables and animal. Based on applications, bakery products, confectionery products, snacks & savory products, and others. By sales channel, it is fragmented into direct and indirect sales. Region wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.

Based on source, vegetables segment held the major share of 81.1% in the global shortening market. This is attributed to the wide usage of vegetables source in the bakery, confectionery products sector. Moreover, animal source witness highest CAGR throughout the forecast period. Animal fats are necessary for cell growth and the protection of organs in the body. Furthermore, fats play an important role in a variety of biological functions, including the production of hormones and the regulation of vitamins. Thus, animal fats are classified into different groups, including saturated, monounsaturated, trans, and polyunsaturated fats, each of which has a different effect on cholesterol levels.
