The aircraft gearbox is the most important part of the transmission system of aircraft for varying rotational speeds and is essential to a functioning engine. Shafts connect the gearbox, and the internal arrangement of a gearbox determines the output torque and speed. The aircraft gearbox is used to increase output torque or to vary the speed (RPM) of a motor. An aircraft gearbox refers to a gearbox as a contained gear train, which is a mechanical part made up of a number of integrated gears housed in a housing.
