The report covers a comprehensive analysis of the competitive landscape with a detailed analysis of the company profiles, product portfolio, and business expansion strategies.

The global hospital gowns market size reached USD 4.24 Billion in 2021 and is expected to register a revenue CAGR of 12.1% during the forecast period, according to latest analysis by Emergen Research. The increasing number of surgeries globally is the main factor driving the market growth of the hospital gowns market. As the number of surgical procedures continues to increase globally, so does the demand for surgical gowns. Medical workers utilize surgical gowns as important protective gear to safeguard patients health from numerous infections, including bacteria and viruses. Microorganisms are unable to pass through clothing if the pores are smaller than the size of the microbes. Manufacturers must consider the product's specification, comfort, and price when making clothing. It is challenging to take each requirement into account. However, producers constantly work to improve their
