

# The Ultimate Guide to Improving Hyperhidrosis Treatment

*The hyperhidrosis treatment market was valued at \$575.32 million in 2021, and to reach \$950.7 million by 2031, growing at a CAGR of 5.1% from 2022 to 2031.*

PORTLAND, OREGON, UNITED STATES,  
February 14, 2023 /EINPresswire.com/  
-- What is Hyperhidrosis Treatment?

Hyperhidrosis treatment refers to the various medical and non-medical approaches used to treat excessive sweating, a condition known as

hyperhidrosis. The treatment options include topical and oral medications, antiperspirants, iontophoresis, botulinum toxin injections, and surgical procedures such as sympathectomy. The treatment approach is usually determined by the severity and location of the hyperhidrosis and other individual factors such as age and overall health. The goal of hyperhidrosis treatment is to reduce or eliminate the excessive sweating and improve the patient's quality of life. The effectiveness of hyperhidrosis treatment varies depending on the specific treatment used and individual patient factors.

## [Hyperhidrosis Treatment market](#)

The hyperhidrosis treatment market refers to the market for products and services that are used to treat excessive sweating or hyperhidrosis. The market includes various types of treatments such as prescription antiperspirants, oral medications, botulinum toxin injections, and surgical procedures. The market is driven by increasing awareness of the condition, growing demand for non-invasive treatments, and rising prevalence of hyperhidrosis. However, high cost of treatments and lack of reimbursement in some regions may hinder market growth. The market is expected to continue growing in the coming years due to ongoing research and development efforts, increasing availability of non-invasive treatments, and rising demand for effective and long-lasting solutions.

## COVID-19 Impact Analysis on Hyperhidrosis Treatment market

The COVID-19 pandemic has had a mixed impact on the hyperhidrosis treatment market. On the one hand, the pandemic has increased awareness of the importance of personal hygiene, which has led to a higher demand for antiperspirants and other topical products that help manage sweating. On the other hand, the pandemic has also disrupted the supply chain and affected the production and distribution of hyperhidrosis treatment products, resulting in a shortage of some products.

Additionally, due to the pandemic, many patients have postponed non-essential medical appointments, which may have delayed the diagnosis and treatment of hyperhidrosis. Moreover, some hospitals and clinics have reduced or suspended non-emergency surgeries, including some surgical procedures used to treat hyperhidrosis. This has impacted the demand for surgical treatments for hyperhidrosis.

However, the impact of COVID-19 on the hyperhidrosis treatment market is expected to be temporary, as the demand for hyperhidrosis treatment is likely to increase in the post-pandemic period due to the rising awareness of the condition and increasing focus on personal hygiene. The market is also expected to benefit from ongoing research and development efforts to develop more effective and safer hyperhidrosis treatments.

### Hyperhidrosis Treatment Market Key Players –

Some of the key players in the hyperhidrosis treatment market include:

1. GlaxoSmithKline plc
2. Dermira Inc. (a wholly-owned subsidiary of Eli Lilly and Company)
3. Revance Therapeutics, Inc.
4. Mylan N.V.
5. Syneron Medical Ltd.
6. Cynosure, Inc. (a subsidiary of Hologic, Inc.)
7. Cutera, Inc.
8. Miramar Labs, Inc. (a subsidiary of Sientra, Inc.)
9. MiraDry, Inc. (a subsidiary of Sientra, Inc.)
10. Sientra, Inc.

These companies offer a range of hyperhidrosis treatment products and services, including prescription medications, botulinum toxin injections, medical devices, and surgical procedures. They are investing in research and development activities to develop new and more effective treatments for hyperhidrosis, and are also engaged in strategic partnerships and collaborations to expand their product portfolio and global reach.
