

Betaine Market to Reach US\$ 5.0 Billion by 2027, Exhibiting a Growth Rate (CAGR) of 5.39%

Global betaine market size to reach US\$ 5.0 Billion by 2027, exhibiting a growth rate (CAGR) of 5.39% during 2022-2027.

Betaine Market

Betaine, also known as betaine anhydrous or trimethylglycine (TMG), is a substance that naturally occurs in the body. It can also be found in foods like spinach, beets, <u>seafood</u>, wine, and cereals. It is extensively distributed among microorganisms, animals, and plants. It is known to function physiologically as a significant osmoprotectant, as well as a methyl group donor. According to the US Food and Drug Administration (FDA), betaine can treat a genetic condition where too much homocysteine builds up in the body.

000000 000000 000000:

The global betaine market is driven by substantial growth in the pharmaceutical, <u>food and beverage</u>, and nutraceutical industries across the globe. Apart from this, the rising demand for nutritional products and dietary supplements is aiding the market growth. Besides this, the extensive adoption of betaine as an anti-stress agent in animal feed is also supporting the growth of the market. Betaine is employed in several feed additives to enhance the metabolism of farm animals and reduce the risks of visual abnormalities as well as developmental delays that are linked to its deficiencies.

In addition, the health benefits linked to product consumption, like better metabolism, endurance, and muscle strength, are expected to boost the demand for the product. Moreover, its intrinsic properties, including high water holding capacity, promote its usage in toiletries and cosmetics, which is anticipated to have a positive influence on the market growth.
