#### Covid-19 Scenario:

The outbreak of the COVID-19 pandemic had a negative impact on the growth of the global cellulose sponge market, owing to disruptions in the supply chain for various industrial products.

In the first quarter of the pandemic, there was complete shutdown of industries such as automotive, cosmetic, chemical, medical, manufacturing, and others due to strict imposition of lockdown, which hampered the growth of the global cellulose sponge market.

Owing to lockdown, manufacturers faced shortage in labor units and production losses. The rising awareness regarding worker security, safety, and guidelines by government posed an additional challenge to resume their basic operations in manufacturing unit.

However, as the restrictions imposed due to lockdowns are being lifted in the fourth quarter of the pandemic, the cosmetic, medical, pharmaceuticals, automotive, and other sectors are expected to recover soon, owing to the record of production unit in both developed and developing economies. This factor will boost the growth of the global cellulose sponge market in the post-pandemic.
