Custom Market Insights

[Ancient and Specialty Grain Flour Market](#): Overview

Flour made from ancient grains, including Barley, buckwheat, Kamut, rye, quinoa, millet, spelled, etc., is known as specialty grain flour. Ancient grain flour is now frequently used as a substitute for modern wheat flour because it is less processed. The majority of ancient grain flour varieties are gluten-free and offer a variety of nutritional advantages. Ancient grain flour is simple to digest and can be used in many recipes that require wheat

or all-purpose white flour.

Ancient and Specialty Grain Flour Market: Growth Drivers

Ancient and specialty grain flours are in high demand due to the changing consumer preferences and the rise in customers searching for healthy foods. Ancient grains do not produce flour like contemporary grains, and cereals like wheat and corn do. Some people find it challenging to digest current flour due to improvements in grain quality and flour processing techniques. Consumers are now looking for gluten-free diets due to the rising prevalence of gluten around the world. But the availability of ancient and specialty grain flours with reduced gluten content has significantly increased customer interest in the goods and helped the ancient and specialty grain flours grow in popularity.

Baked goods, confections, and ready-to-eat foods are among the many uses for ancient and specialty grain flour. Additionally, the growing use of ancient and specialty grain flour is driven by the global trend toward organic food consumption. As a result, the market players provide a wide variety of ancient and specialized grain flour products that range from single-grain flour to flour made from a combination of multiple grains.

Regional Landscape

According to estimates, the Asia Pacific region would see a rise in sales of ancient and specialty grain flour due to the rising demand for healthy bakery and confectionary items. A few key

factors influencing the demand for bakery and confectionery items are:

The enormous youth population.
Changing lifestyles.
Preferences for convenience.
The influence of western culture.
Rising desire for healthy snacks.

Also, manufacturers in the region have the chance to create healthier bakery and confectionery items as the demand for such products rises, which will broaden their customer base.
