

Pharos Achieves ISO 27001 Certification

Pharos Systems International announced it is an ISO/IEC 27001:2013 certified provider.

WEST HENRIETTA, NEW YORK, UNITED STATES, February 14, 2023

[/EINPresswire.com/](#) -- [Pharos Systems International](#), a leading cloud services and technology company specializing in print management software and solutions, announced it is an ISO/IEC 27001:2013 certified provider whose Information Security Management System (ISMS) has received third-party certification from the International Standards Organization.

This certification demonstrates that Pharos has met rigorous international standards to help ensure the confidentiality, integrity, and availability of Pharos Systems International information corporate assets as well as Pharos Cloud, Blueprint, and Uniprint products. One of the primary concerns of organizations with moving their critical applications—such as print—to the cloud is the security of their data, and with the ISO/IEC 27001 certification, Pharos customers know that their information is properly safeguarded.

“

Achieving this certification is a testament to our dedication and the priority we place on protecting our assets and the information with which our customers entrust us”

Kevin Pickhardt, Chief Executive Officer, Pharos

ISO/IEC 27001:2013 is an information security management system standard published by the International Organization for Standardization (ISO) and

the International Electrotechnical Commission (IEC). A-LIGN, an independent, third-party auditor accredited by the ANSI National Accreditation Board to perform ISMS 27001 certifications, found Pharos to have technical controls in place and formalized IT Security policies and procedures. Pharos has implemented security measures and countermeasures that protect it from unauthorized access or compromise and IT personnel were found to be conscientious and knowledgeable in best practices.

Compliance with this internationally recognized standard confirms that Pharos’ security

management program is comprehensive and follows leading best practices. This certification demonstrates Pharos' continued commitment to information security at every level and ensures customers that the security of their data and information has been addressed, implemented, and properly controlled in all areas of our organization.

"As a market leader in the cloud print management space, Pharos understands the increasing and constantly-evolving nature of cyber threats—we've always had a relentless focus on security" said CEO Kevin Pickhardt. "Achieving this certification is a testament to our dedication and the priority we place on protecting our assets and the information with which our customers entrust us."
