

Trikke Positron Set to Make Global Debut at International Police Summit

The mobility vehicle offers several advantages over traditional forms of patrolling.

BUELLTON, CA, UNITED STATES, February 15, 2023 /EINPresswire.com/ -- Trikke, the industry leader in reliable alternative transportation for law enforcement agencies, is thrilled to be an exhibitor at the World Police Summit, the self-described “world’s largest convention for policing and law enforcement officials,” from March 7-9, 2023, at the World Trade Centre in Dubai, United Arab Emirates. The summit will include over 200 speakers, 250 exhibitors, and more than 15,000 attendees who will explore emerging technologies and cutting-edge solutions designed to redefine the future of policing.

“

Our vehicles offer law enforcement a mobility solution that bridges the gap between traditional squad cars and foot patrol.”

Gildo Beleski, CEO

“Visitors will meet the best electric personal patrol vehicle in its category,” said Gildo Beleski, Trikke CEO and Chief Engineer. “Our flagship model, the [Positron 72V Elite](#), has speeds of up to 44 mph, and can go as far as 35 miles on a single charge.”

Trikke has been a frequent exhibitor at law enforcement and security-related shows, including the annual gatherings of the International Association of Chiefs of

Police, the National Sheriffs Association, and the International Association of Campus Law Enforcement Administrators. However, this will be the company’s first foray into a trade show on the world stage.

“We hope to expose our products and technology to quite a different market,” said Beleski. “Also, we want to establish commercial partnerships with local representatives and learn how we can customize our vehicles to their needs.”

Trikke Professional Vehicles are prevalent in the United States, but recently, the UAE Armed Forces obtained a fleet of Positrons. Additionally, the Dubai World Trade Centre — the home of the summit — deploys the Trikke Defender for its security patrols.

“Our vehicles offer law enforcement a mobility solution that bridges the gap between traditional squad cars and foot patrol,” said Beleski. “The Positron can navigate sidewalks, streets, parking garages, and hallways, and allows for a quicker response time than cars in congested areas.”

About Trikke Professional Mobility

Trikke Professional Mobility is a US-based manufacturer and distributor of rugged professional-grade personal patrol vehicles with all-wheel-drive and a proprietary cambering design for efficiently moving around large campuses, congested areas, and public events. Trikke vehicles are quiet and ergonomic, with high-torque electric motors and heavy-duty construction. The frame folds flat for easy deployment and storage in a small footprint, and the lithium-ion battery can be swapped out for quick recharging. These vehicles are designed for around-the-clock operations and are currently in use by many police departments around the US. Trikke leads the law enforcement industry in reliable alternative transportation.
