PatchMaster's business model offers customers a fast, professional solution for drywall repair. Most handymen, contractors, and large drywall companies want to do more than just minor drywall repair. That is where PatchMaster fills the critical niche in the market. PatchMaster repairs holes caused by renters, plumbing leaks, and DIY projects that never seem to end. Most PatchMaster repair jobs are done in a single visit.

PatchMaster is an in-demand franchise with a quick ramp-up period. No drywall experience is required for owners—PatchMaster provides all the training, tools, and resources to learn the model and run the business. Franchisees have access to support for marketing, including digital marketing and social media, job pricing, hiring, managing technicians, and financial management.

The initial franchise fee for a PatchMaster franchise territory, which comprises a population between 300,000 to 350,000, is \$49,500 USD. Royalties start at nine percent, and a technology fee is included in ongoing expenses. In addition to strong margins, the ability to scale, and proven business development tools, franchisees complete training at the company's New Jersey headquarters, where industry experts teach them technical and operational skills to assist in their success.
