Trending Airport Construction Market Trend

Technology advancements in new airport terminal projects are a key trend gaining popularity in the airport construction market. Major companies in the airport construction market are advancing in their new technologies and development, to gain market share. For instance, in June 2022, ADB Safegate, a US-based provider in airfield, gate, airport systems, and tower solutions provider introduced a unique Safedock X Advanced Visual Docking Guidance System (A-VDGS), bringing completely automated airport apron management one step closer to reality by combining innovative surveillance technologies, contemporary display capabilities, and

superior integration to assure safe docking in all-weather situations. The new display is a critical component in supporting airport collaborative decision making (A-CDM), assisting in reducing delays and shortening gate rotations because it can provide more information to meet any apron management task. A transportable operator panel gives ground employees more situational awareness and flexibility, while Safedock X can accommodate independent displays for aircrew and ground crew.

Airport Construction Market Segments

- By Technology: Security Systems, Communication Systems, Passenger, Cargo and Baggage Ground Handling Control, Air or Ground Traffic Control
- By Location: Landside, Airside, Terminal Side
- By Applications: Defense and Military, Commercial And Civil
- By Geography: The global airport construction global market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
