Market Definition:

Water rights, commonly referred to as water access entitlements, are purchased and sold through the process of water trading. The terms of the exchange can be either permanent or temporary, depending on the country's statutory structure for water rights. Water rights are exchanged in permanent trade. For instance, a permanent entitlement holder may sell their water claim to another party interested in water. Yet, temporary trade refers to the yearly exchange of water allocations to parties interested in receiving water. In order for the buyer to meet his needs, water trading entails the voluntary transfer of a preset amount of water between the buyer and seller.

This Report Profiles The Following Key Players:

The survey included a diverse set of players, including a balance of leading and growing manufacturers for business profiling, such as;
