

"And the Winner Is..." AV-Comparatives is Celebrating Excellence at the Annual Awards Ceremony 2022/2023

IT Security vendors recognised for their performance in antivirus tests of 2022.

INNSBRUCK, TYROL, AUSTRIA, February 28, 2023 /EINPresswire.com/ -- [AV-Comparatives](#) has rewarded security-software vendors whose products stood up to the cyber threats of 2022 for their achievements. After a two years break due to Covid, it is possible to host the award ceremony on-site and handing over the Vendors' awards in person.

As in previous years, major awards were for the best Windows security products in the Consumer Main-Test Series. This subjects consumer security products to several demanding [tests](#), covering different protection scenarios, false positives, and system performance impacts.

“

We congratulate the AV-Comparatives Award Winners for their effective and reliable products.”

Andreas Clementi, Founder and CEO, AV-Comparatives

The "Product of the Year Award "for the best overall results went to Bitdefender for its excellent performance in the 2022 Main-Test Series.

Avast, AVG and Kaspersky also achieved exceptional results in the year's tests, for which they were rewarded with "Top-

Rated Product" awards.

Amongst the products tested by AV-Comparatives in 2022 were: security programs for Windows consumer devices, macOS and Android; EPP (endpoint protection) and EPR (endpoint prevention and response) products for enterprises; anti-phishing and parental control products. Overall, AV-Comparatives performed more tests than ever to keep up with the cybercriminals.

AV-Comparatives' test methodologies are designed to provide rigorous tests that emulate real-life scenarios. A certification by the Austrian test lab is a guarantee of an effective and reliable product.

Both the Consumer and Enterprise Main-Test Series consist of several different individual tests, providing an overall assessment of the product's capabilities. These were: Real-World Protection Test (protection against Internet-borne malware); Malware Protection Test (protection against malware on the local area network or external device); Advanced Threat Protection Test (protection against targeted attacks); Performance Test (impact on system speed); False Positives Test (number of false alarms).

The following vendors (in alphabetical order) received awards for their products in AV-Comparatives' tests of 2022:

Acronis; Avast; AVG; Avira; Bitdefender; Cisco; CrowdStrike; Cybereason; Elastic; ESET; Fortinet; G Data; K7; Kaspersky; Malwarebytes; McAfee; Microsoft; Norton; Palo Alto Networks; Panda; Securian; Sophos; TotalAV; Total Defense; Trellix; Trend Micro; VIPRE; VMware; WatchGuard.

AV-Comparatives provides freely accessible test results to individuals, news organizations and academic institutions.
