

TierOne Streamlines Edge Infrastructure Management with the Release of Edge Authority™ 3.0

TierOne empowers CSPs and enterprises with TierOne Edge Authority™ 3.0, a fully Configurable Infrastructure Management Solution for uCPE and Edge Devices.

MISSISSAUGA, ONTARIO, CANADA,
February 21, 2023 /EINPresswire.com/

-- As edge computing continues to grow, and new use cases emerge, managing the hardware infrastructure of edge devices can be a challenge.

[TierOne Edge Authority™ 3.0](#)

streamlines the management of multi-vendor Edge devices, providing functionalities including Zero Trust security, assurance visualization and edge automation functions. It supports the entire lifecycle of edge devices

from Day 0 design, Day 1 deployment with Zero Touch Provisioning (ZTP) to Day 2+ operations.

TierOne OSS Technologies Inc.

Solution Overview:

- Incorporates the open standard OAuth for delegated authorization and Open ID Connect (OIDC) to add a standards-based authentication layer.
- Enables remote activation, reconfiguration and upgrading of UEFI and Firmware.
- Offers the ability to respond to a variety of operating conditions with service graphs.
- Leverages Open APIs (compliant with TMF specifications) and model-driven templates for seamless edge automation across any mix of vendors and network layers.
- Integrates with any Network Functions Virtualization (NFV) architecture components from third-party vendors, allowing CSPs and enterprises to control and manage the lifecycle of their Virtual Network Functions (VNFs).
- Deploys, scales, and manages through Kubernetes and Red Hat OpenShift Container Platform.
- Utilizes Kafka to publish updated edge inventory data and integrate external events and tasks

to drive infrastructure automation processes.

- Includes pre-configured Open RAN and vRAN servers, as well as HPE ProLiant DL110, DL360, DL380.

Supporting Quotes

"[TierOne](#) Edge Authority™ 3.0 offers a customer-centric solution that streamlines edge infrastructure management, creating opportunities for CSPs and enterprises to operate more efficiently," said Kevin O'Keefe, VP of Product Management at TierOne OSS Technologies. "With a wide range of industry standards and components from our market-leading product portfolio, we're extending our expertise in edge computing and hybrid networks to accelerate our customers' 5G network transformation."
