"Where the Truckers Truck"

Dr. Slaughter's doctoral research focused on behavioral and labor economics of the long-haul truck driver labor market. His work culminated with writing Synthesis of Long-Haul Truck Driver Labor Market Desires and Dysfunctions, an award-winning research project which uncovered and conveyed groundbreaking findings related to truck driver job dissatisfaction and turnover intention. Dr. Slaughter continues to research truck drivers from a behavioral economic perspective. This research focuses on the environmental, physiological, and psychological impacts on decision-making, especially when those decisions conflict with the implied rational choices put forth by classical economic theory. In 2023, Dr. Slaughter is taking on the role of Primary Investigator to lead a team of researchers from various prestigious universities to study sleep quantity and quality of over-the-road truck drivers, and the potential implications of introducing of sleep improving interventions such as state-of-the-art mattresses and sensory deprivation technologies. This study aims to begin laying the groundwork for improving the working and living environment for long-haul truck drivers and to promote a healthier lifestyle, safer driving, increased job satisfaction, and lower turnover intention.

In addition to his research, Dr. Slaughter is considered a leading expert by his peers in the application of the Virtuous Business Model (VBM). The VBM is a holistic framework designed to drive ethical, moral, and multi-framed decision-making and behavior at individual and organizational levels. Given this expertise, Dr. Slaughter is a working co-author of Virtuous

Business Model: A Model Approach. This publication will demonstrate real-world applications of the VBM and includes contemplative exercises to sharpen leadership skills and organizational potential. In addition, Dr. Slaughter offers coaching and guidance to high-ability or high-performing individuals to maximize their potential and develop higher levels of emotional intelligence and self-command.

Christenson Transportation is a family-owned freight and logistics services company, established in 1979 and based in Strafford, Missouri.
