

With 5.9%% CAGR, Surgical Sutures Market to Reach US\$ 6.9 Billion by 2028 | Global Industry Report

Surgical sutures refer to medical devices used by doctors and healthcare professionals to close wounds or other tissues after an injury or surgery

BROOKLYN, NY, USA, February 21, 2023 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "Surgical Sutures Market: Global Industry Trends, Share, Growth, Opportunity and Forecast 2023-2028," the [global surgical sutures market size](#) reached US\$ 4.8 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 6.9 Billion by 2028, exhibiting a growth rate (CAGR) of 5.9% during 2023-2028.

Surgical sutures refer to medical devices used by doctors and healthcare professionals to close wounds or other tissues after an injury or surgery. These are threads or strands manufactured using natural fibers like silk and synthetic materials, such as polyester, polydioxanone (PDS) and polyglactin. They are usually applied using a needle with an attached thread and secured with a surgical knot. Depending on the requirements, they are widely available in absorbable and non-absorbable variants. Since they have excellent tensile strength, sterility and flexibility, surgical sutures find extensive applications in the healthcare sector.

Surgical Sutures Market Trends:

The rising number of individuals undergoing surgical procedures due to improved efficiency and safety represents the primary factor driving the market growth. In addition, the growing geriatric

population and the widespread prevalence of chronic ailments, such as cardiovascular diseases (CVDs), arthritis, cancer and obesity, are other major growth-inducing factors. Besides this, a significant rise in fatal road accidents and high hospital admission rates are also escalating the demand for surgical sutures. Furthermore, various key players are launching advanced products like surgical sutures that facilitate scar-free wound healing while minimizing wound tension, ischemia and tissue injury. This, in confluence with the increasing usage of these sutures in aesthetic plastic surgery procedures, including Brachioplasty, Platysmaplasty, Mastopexy, and brow, midface, and lateral neck suspension, is catalyzing the market growth. Moreover, several technological advancements and rising healthcare expenditure by the governments of various nations are some of the other factors creating a positive market outlook.

Surgical Sutures Market 2023-2028 Competitive Analysis and Segmentation:

Competitive Landscape With Key Players:

The competitive landscape of the global surgical sutures market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

- Advanced Medical Solutions Group plc
- Braun Melsungen AG
- Boston Scientific Corporation
- CONMED Corporation
- DemeTECH Corporation
- Integra LifeSciences
- Johnson & Johnson
- Medtronic plc
- Mellon Medical B.V.
- Smith & Nephew plc
- Stryker Corporation
- Teleflex Incorporated
- Zimmer Biomet

Key Market Segmentation:

The report has segmented the global surgical sutures market on the basis of type, material, application and end user

Based On Type:

- Absorbable Sutures
- Non-Absorbable Sutures

Based On Material:

- Monofilament
- Multifilament

Based On Application:

- Cardiovascular Surgeries
- General Surgeries
- Gynecological Surgeries
- Orthopedic Surgeries
- Ophthalmic Surgeries
- Others

Based On End User:

- Hospitals and Clinics
- Ambulatory Surgical Centers
- Others

Based On Region:

- North America (United States, Canada)
- Europe (Germany, France, United Kingdom, Italy, Spain, Others)
- Asia Pacific (China, Japan, India, Australia, Indonesia, Korea, Others)
- Latin America (Brazil, Mexico, Others)
- Middle East and Africa (United Arab Emirates, Saudi Arabia, Qatar, Iraq, Others)
