Preclinical CRO (Contract Research Organization) is a company that provides research services to pharmaceutical and biotechnology companies to support their drug development efforts before the drug enters clinical trials in humans. Preclinical CROs conduct various preclinical studies to evaluate the safety, efficacy, and pharmacology of drug candidates.

Preclinical studies are typically conducted on animals, such as mice, rats, or non-human primates, to test the potential toxicity and pharmacokinetics of the drug candidate, as well as to determine the appropriate dosing regimen for clinical trials in humans. These studies may also include in vitro experiments to assess the drug's interaction with cells and tissues.

Preclinical CRO Market: Demand Analysis & Opportunity Outlook 2030

Preclinical CRO research study defines market size of various segments & countries by historical years and forecast the values for next 7 years. The report is assembled to comprise qualitative and quantitative elements of Preclinical CRO industry including: market share, market size (value and volume 2017-2021, and forecast to 2030) that admires each country concerned in the competitive marketplace.
