

World's leading foresight advisory firm unveils insight on the future of geopolitics in 2023

New insight identifies the biggest ways technology could shift geopolitics in 2023

TORONTO, ON, CANADA, February 23, 2023 /EINPresswire.com/ -- A new insight from the leading foresight advisory firm, [Center for Innovating the Future](#) (CIF), highlights the most significant ways technology could shift geopolitics in 2023. The insight, titled "Geopolitics and Tech: Mapping the Biggest Shifts for 2023," outlines unprecedented changes on the world stage, affecting everything from globalization to sustainability to finance.

The insight identifies ten new vectors that are likely to be of particular concern in 2023, including:

Disinformation War
Crypto Trade
Turbulent Space

“

The conflict in Europe has been driven, not by diplomacy, but by drones (robots) supplied by Iran and Turkey.”

Abishur Prakash

Center for Innovating the Future

“As the biggest war in Europe since World War II enters its second year, technology is driving geopolitics in unprecedented ways,” said [Abishur Prakash](#), co-founder of CIF. “The conflict in Europe has been driven, not by diplomacy, but by drones (robots) supplied by Iran and Turkey. And, on the ground, algorithms and internet, supplied by Silicon Valley, are helping track casualties and keep society and economy online.”

CIF's insight builds on the current geopolitical status quo, where the biggest tensions between the US and China today have to do with chips (Taiwan) and apps (TikTok). And, where the protests in Iran are being supported by private satellites beaming down internet - out of the control of Tehran.

About Abishur Prakash:

Abishur Prakash is a geopolitical futurist and co-founder at Center for Innovating the Future (CIF). In 2013, he coined the expression, "Next Geopolitics," to define how technology

is remaking world affairs. He is also a keynote speaker and the author of five books, including "Go.AI (Geopolitics of Artificial Intelligence)" and ["The World Is Vertical: How Technology Is Remaking Globalization."](#)

About Center for Innovating the Future:

Center for Innovating the Future (CIF) is in the business of discovering possibilities. It is a foresight advisory firm based in Toronto, Canada. CIF is on a mission to make leaders prescient and PROFIT FROM THE FUTURE®. For more than a decade, CIF has been at the forefront of discovering possibilities and has worked with countries and some of the world's largest companies.
