Looking forward, IMARC Group expects the market to reach a value of INR 1,124 Billion by 2028, exhibiting a CAGR of 4.0% during 2023-2028.

India Poultry Feed Industry Definition and Application:

Poultry feed is a prepared for different birds, such as chickens, ducks, geese, quails, and turkeys. It is made by blending various ingredients, such as grains, oilseeds, fish, and supplements, in a specific ratio to meet the nutritional requirements of the birds. It provides essential nutrients like water, proteins, carbohydrates, fats, vitamins, minerals, and other supplements to support the health and growth of the birds. It promotes weight gain, boosts immunity, minimizes stress, alleviates digestive issues, strengthens bones, and prevents diseases in birds. At present, poultry feed is gaining popularity among farmers for the health and well-being of poultry animals and the production of high-quality end products, such as [meat](#) and eggs.

India Poultry Feed Market Trends:

Changing dietary patterns and rising consumption of poultry-based products, such as eggs and meat, due to their numerous health benefits on hair, skin, and the immune system represents one of the key factors positively influencing the market in India. In addition, the easy availability of poultry-based dishes, such as chicken biryani, roast duck, turkey burger, egg salad, stews,

prosciutto, risotto, and grilled quail, in restaurants is strengthening the market growth in the country. Apart from this, favorable initiatives by the Government of India (GOI) to boost poultry production, establish poultry feed plants, and promote rural poultry entrepreneurship through financial incentives are creating a favorable market outlook. Furthermore, the rising awareness among poultry farmers about the importance of high-quality feed and the increasing affordability of poultry feed are stimulating the growth of the market in the country.
