ST. BROOKLYN, NY, USA, February 22, 2023 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "Global Potato Starch Market Size, Share, Growth, Opportunity, Emerging Trends and Forecast to 2027", the [global potato starch market size reached 3.9 Million Tons in 2021](#). Looking forward, IMARC Group expects the market to reach 4.7 Million Tons by 2027, exhibiting a growth rate (CAGR) of 2.84% during 2022-2027.

Potato starch is a powder extracted from the root tubers of the potato plant. It has a neutral taste, high-binding strength, and low foaming properties with minimal fat and protein. Its unique properties provide a fluffy, light texture to baked goods such as muffins and quick bread. Regular consumption of potato starch can help regulate blood sugar levels and aid absorbing essential minerals, such as calcium and magnesium. Currently, it is widely used as an additive, thickener, stabilizer, and adhesive agent in the food, paper, pharmaceutical, and textile industries.

## Potato Starch Market Trends:

The global potato starch market is primarily propelled by the growing health-conscious and rising vegan population. Moreover, the ready availability of raw materials for production processes and the surging product application in the processed meat industry to manufacture products such as bologna, frankfurters, hamburgers, and meatloaves, are creating a positive outlook for the market. Besides this, the rising product application in the paper and chemical industry due to their adhesive and solubility properties and easy product availability in online retail stores are providing an impetus to the market growth. In line with this, key players in the market are introducing new product variants with specialty enzymes and organic materials to increase their consumer base, which, in turn, is creating a positive outlook for the market.
