Global Liquid Dietary Supplements Market Report by IMARC Group

Market Trends:

The rising prevalence of undernutrition, particularly among children and the geriatric, is a primary driver accelerating the global liquid dietary supplements market growth. In line with this, key manufacturers are offering specialized products with added protein and calories to meet the specific nutritional requirements of individuals. They are also introducing new product variants for patients undergoing different treatments, such as dialysis, which, in turn, is contributing to market growth. Moreover, the increasing number of chronic illnesses and the surging health consciousness among individuals are providing an impetus to the market growth. Apart from this, the rising consumer awareness regarding the health attributes of liquid dietary supplements and easy product availability in online distribution channels are boosting the market growth.
