Drivers, restraints, and opportunities-

Increased demand for convenience food such as packaged food and ready-to-eat food drives the growth of the anti-caking agents market. On the other hand, strict government policies regarding the usage of chemical products restrain the growth to some extent. However, advent of top-end anti-caking agents and their features that benefit retailers to understand consumer behavior is expected to create lucrative opportunities in the industry.

□□□ □□□ □□□□□□□□□□ □□□□□□□□□□:

The major players analyzed for the global Anti-Caking Agents industry are Evonik Industries AG

(US), PPG Industries Inc. (US), Brenntag AG (Germany), Univar Solutions Inc. (US), Solvay SA (Belgium), Cabot Corporation (US), Agropur Ingredients (US), Huber Engineered Material, Kao Corp., IMAC Inc.

Anti-caking chemicals are used in food and beverages due to rising customer demand for takeout, fast food, and processed foods. Powered cellulose tricalcium phosphate, sodium bicarbonate, polydimethylsiloxane, magnesium trisilicate, potassium aluminum silicate, and polydimethylsiloxane are a few of the commercial anti-caking substances on the market. By type, it is classified into calcium compounds and sodium compounds, and others. The sodium compounds segment is anticipated to grow at the highest rate during the forecast period, owing to the growing desire of the youth population for health benefits.

□□□□□□□□ □□□□□□□□:

By region, Europe held the major share in 2021, contributing to more than one-third of the global anti-caking agents market. The same region is also anticipated to showcase the fastest CAGR of 7.1% from 2022 to 2031. In order to satisfy consumer demand and increase overall production, European businesses are investing in their infrastructure. In light of all these influences, the market for bakery ingredients in this province is expanding with a full sway.

In 2021, Europe accounted for 34.5% of the global Anti-Caking Agents Market Share and is

expected to maintain its dominance during the forecast period. High demand for bakery food products has led to the use of food additives such as anti-caking agents in the region. Spain, Germany, and France are expected to be the largest markets due to their higher feed production than other European countries. Driven by growing demand for higher-quality meat products, the feed additive market in the region, especially anti-caking agents, is growing rapidly.
