Container homes are prefabricated homes developed using new and old shipping containers used to carry goods on trains, trucks, and ships. The shipping containers can handle heavy loads and can resist in harsh conditions. Moreover, the containers can be structured and stack easily to construct small & multi storey house, owing to their perfect shape. The container homes provide best solution in emergency shelter these containers can be moved easily.

The reduced construction cost, ease of installation and relocation, increase in focus toward adoption of green building concepts, rise in need for protection of architecture from environmental impacts, and need for compact & movable homes in large cities due to lack of space, are major factors that boost the demand for container homes. Furthermore, lack of housing units, increase in focus toward adoption of affordable housing structures, and rise in need for construction in developed countries are expected to provide lucrative growth opportunities to prefabricated container homes manufacturers. However, high risk on corrosion to these homes and short life span are expected to hinder the market growth.
