Rise in adoption of smart cities, growing number of projects under various government smart city initiatives, and surge in need for better natural resource management in urban environments drive the growth of the global smart city platform market. On the other hand, security concerns associated with smart cities and lack of funding & adequate infrastructure restrain the growth to some extent.

The smart city platform market is segmented on the basis of offerings, deployment model, application, and region. By offerings, the market is bifurcated into platform and service. By

deployment model, the market is segmented into on-premise and cloud. Based on application, the market is divided into smart infrastructure, smart governance and smart education, smart energy, smart mobility, smart healthcare, smart buildings, and others. Region-wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

By application, the smart infrastructure segment garnered nearly one-fifth of the global smart city platform industry share in 2021, and is expected to retain its dominance by 2031, owing to growing demand for smart infrastructure solutions. The smart energy segment, on the other hand, is expected to exhibit the fastest CAGR of 18.9% from 2022 to 2031. This is due to the increasing need for sustainability solutions in the energy sector.

By offerings, the platform segment contributed to more than three-fifths of the global smart city platform market share in 2021, and is expected to lead the trail by 2031. Growing need for automation and IoT applications in modern cities drives the segment growth. The service segment, however, is expected to exhibit the fastest CAGR of 17.5% from 2022 to 2031, due to the rising large-scale application of smart cities.

For Report Customization: <https://www.alliedmarketresearch.com/request-for-customization/30635>

Based on region, North America held the major share in 2021, generating around two-fifths of the global smart city platform market. High concentration of specialized ICT and IoT vendors across the region propel the market growth. Asia-Pacific, on the other hand, would garner the fastest CAGR of 19.5% by 2031. This is attributed to the ongoing digital transformation across the region.

The key players profiled in the Smart City Platform market analysis are Alibaba Group Holding Limited, Amazon Web Services, Inc., Bosch.IO GmbH, Quantela, Inc., Cisco Systems, Inc., Telefonaktiebolaget LM Ericsson, Fujitsu Limited, Fybr, Google LLC, Hitachi, Ltd., Huawei Technologies Co., Ltd., International Business Machines Corporation, Intel Corporation, KaaloT Technologies, LLC., Microsoft Corporation, NEC Corporation, Oracle Corporation, and SAP SE.
