Efforts to Combat Extremism and Terrorism

Andy Vermaut shares: "Prevention efforts of the UAE are crucial in the fight against extremism and terrorism. Clinics offering rehabilitation treatments to persons at risk of radicalization have been set up as part of the government's preventative effort to curb radicalization. This strategy has been effective in reducing radicalization and spreading knowledge. A major weapon in the fight against extremism and terrorism is the country's emphasis on rehabilitation.

The UAE offers convicted felons a chance to rehabilitate themselves and reintegrate into society after serving their sentences, instead of simply condemning them for their involvement in terrorist operations. The country provides these individuals with necessary tools and support through rehabilitation facilities. Additionally, the UAE imposes strict sanctions on those who engage in violent or illegal behavior as part of their enforcement strategy. Every branch of the country's police force has received intensive preparation for the threats they face. In addition, an Anti-Money Laundering and Counter-Terrorism Financing Unit was formed to fight money laundering and the funding of terrorism. Collaboration is the UAE's fourth and final pillar of strategy. The United Arab Emirates (UAE) understands the need of working together with nations throughout the world to prevent violent extremism and terrorism. The government has partnered with other countries and worked with international organizations to tackle the problem on a global basis," Is Andy Vermaut sharing his story with us.
